

WAS IT THE 60s?

By Mel Neff

This country originated from a few scattered colonies barely hanging on through starvation, bitter cold, sickness and the lack of survival skills in this New World. And yet, it grew to become the most powerful nation on earth.

But we are told by some that we should be ashamed of our success. What do we have to be ashamed of? Our forefathers fought and died to get us to this juncture. Instead of feeling embarrassed by success we should be proud and drop to our knees and thank God for the many blessings that have been bestowed upon this land.

These United States have been attacked by a people who are still stuck somewhere in the 14th century and are too backward to even build a castle. If you think about it, jousting from a camel might not be the best way to go. The people who have tested and attacked us for more than two decades are still confident that we are cowards. If you look at our elected officials

one can easily see why.

A small but vocal part of our population want to bow down and give our enemies whatever they ask for. This goes back to a genetic flaw in their makeup. Their parents were chanting "better red than dead" back in the 60s and only have the stomach for a fight in the court system while standing behind a socialist lawyer who also is a yellow coward. Their grand parents and great grandparents likely thought world wars one and two were Europe's problem while their great, great grandparents believed it would be better to live under the oppression of the English Crown than to fight for freedom.

Every night on the main stream media we are told what we should believe and spoon fed lies and half truths by over-paid news readers, who couldn't string three words together without a teleprompter. Many chain news organizations are owned and managed by the same type of socialist extremists.

Our local Congressman belongs to a socialist club (the Progressive Caucus – the legislative arm of the American Socialist Party) back in Washington DC.

We are told our enemies are angry and we should look at our policies and change them to make amends. Our Democrat President has been going back to the same countries that have turned their backs on us and made friendly overtures to them. These are the same people who defied the coveted United Nations embargoes and cut deals under the table with Iraq to obtain Oil for Guns. My personal thought is, we don't need to cower down to fair weather friends.

We now have an administration that believes that everyone who owns a firearm, believes in God, disagrees with gay marriage, abortion or illegal immigration is a potential terrorist. To them, the real people in this country are just an inconvenience with no other purpose than to generate tax money so they can pursue their goal of a socialist utopia.

The liberals in all the media want to drag us down, disarm the citizens, disband the military and turn the United States into a third world country governed by the United Nations. To them, this will not create a Utopian World. It will create a Global Monarchy with only two classes of people,

those who have everything and those who will never have anything. You and I, my wonderful readers, will be among the have nothing's.

In the past seventy five years our freedoms have been eroded by liberal lawyers and politicians to the point that a small group of five vocal people can stop you or I from using the land we bought and paid for and now pay taxes on for a use that we feel is our right. And no, I don't think everybody's crazy but me. I think we are all crazy for voting for people who only have their own benefit or agenda on their minds. We have elected corrupt politicians to Salem and to Washington D.C. that pander to special interests who want to change this country into something that was never intended by the founding fathers. They would enslave the rest of us to

their populist ideals and totally discard the concepts of right and wrong. Remember, you and I are not nearly as equal as some special interest group that has the money to buy their own politicians.

Now, as we watch, our government is in the process of nationalizing the banking industry, the insurance industry, the automotive industry and creating a huge debt that even our grandchildren won't be able to repay.

What is wrong with success? Why is it that when something works, some do-gooder wants to change it? Isn't this the movement that started in the sixties with a bunch of dope smoking hippies trying to tell us there is no God, there is no morality and we're all parasites on the earth? All I want is the Government out of our bedrooms, out of our lives and most of all out of our pockets!

KIDS WITH CAMERAS

Benefit For Hope presents Kids With Cameras, a free photography class for kids 10-18 yrs old, in Coos County. The program will teach basic photography skills, how to use your imagination, and to see the world around you in a new way. We will be preparing your photos for the local fairs as well. Classes will begin in May at The Studio in Bandon.

For those who do not have access to a digital camera, we do have a few cameras for students to use during the class. For more information or to register contact us at 347-4981 or www.benefit4hope.com
